

AI Ambition/THREAD Solution Architecture

Processing GCP Project ID:
mtch-eda-processing-dev
mtch-eda-processing-uat
mtch-eda-processing-prd

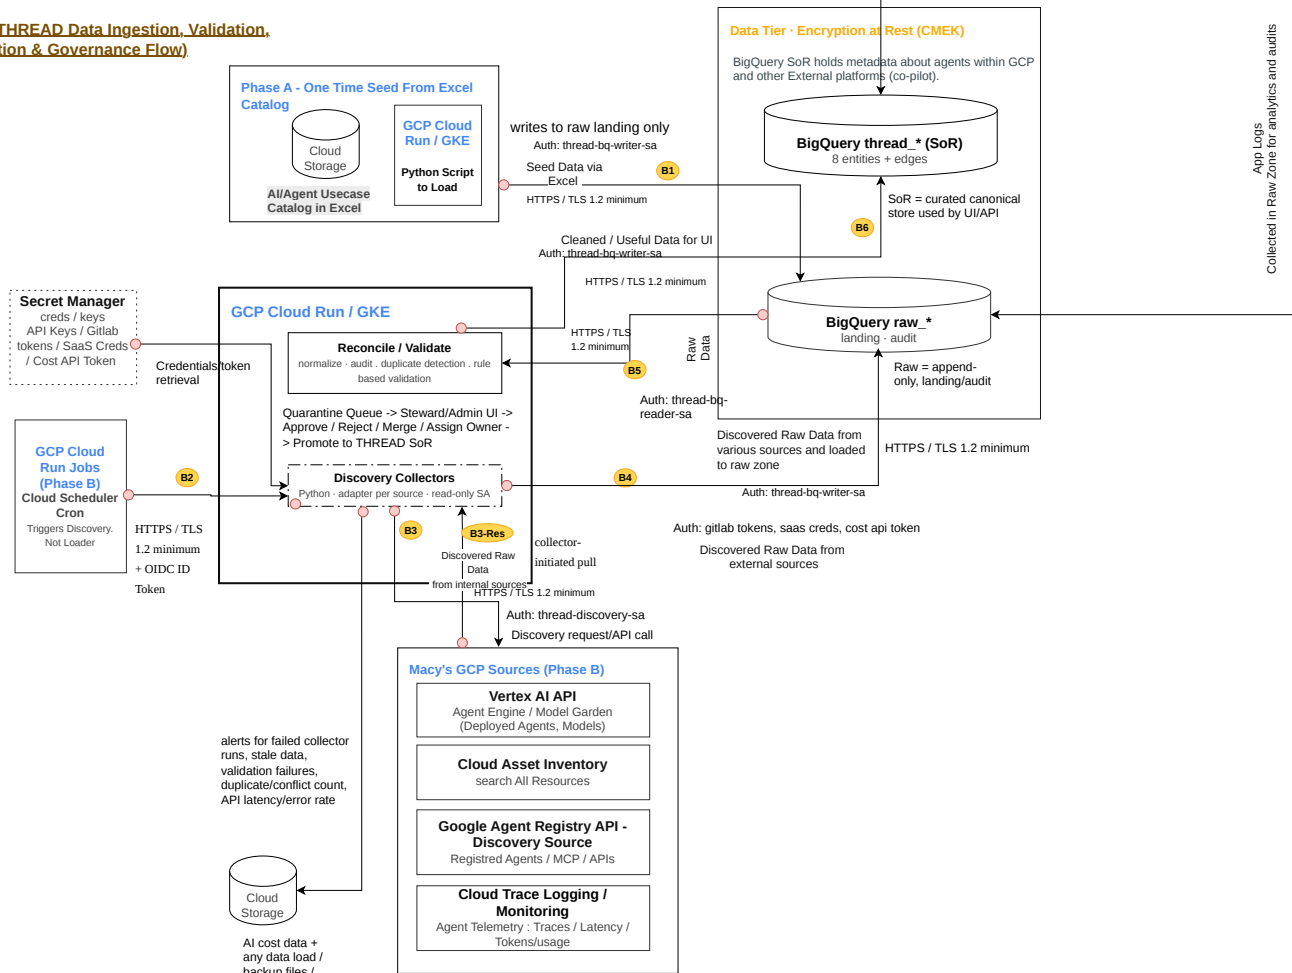

Env :
Dev, UAT, Prod

Data GCP Project ID:
mtch-daas-internal-data-dev
mtch-daas-internal-data-uat
mtch-daas-internal-data

GCP Project Boundray (Data Zone)

SECTION B: THREAD Data Ingestion, Validation, Canonicalization & Governance Flow

Flow Table A: THREAD Serve - UI, API, Auth, Controls

Step	Initiator	From	To	Data	Auth	Encryption	Classification
A1	User	Browser	THREAD application endpoint through Equinix and Apigee API Gateway	Login request	No application session initially; authentication is initiated through ForgeRock SSO	HTTPS / TLS 1.2 minimum	Protected
A2	THREAD application / browser	THREAD application / browser	ForgeRock IAM	OIDC authentication request, including client ID, redirect URI, scopes, state.	OpenID Connect (OIDC) over OAuth 2.0	HTTPS / TLS 1.2 minimum	Sensitive
A3	ForgeRock IAM	ForgeRock IAM	THREAD application / browser	Authentication response containing authorization code and/or identity and access tokens	OAuth 2.0 authorization flow with OIDC tokens	HTTPS / TLS 1.2 minimum	Highly Sensitive
A4	Browser/UI	Browser/UI	THREAD API	Agent search/update	OIDC tokens, RBAC	HTTPS / TLS 1.2 minimum	Sensitive
A5	THREAD API	API	BigQuery SoR	Registry query/update	Service account	HTTPS / TLS 1.2 minimum	Sensitive
A6	THREAD API	API	Audit Log	Create/update/delete audit	Service account	HTTPS / TLS 1.2 minimum	Sensitive

Flow Table B: THREAD Data Ingestion, Validation, Canonicalization & Governance

Step	Initiator	From	To	Data	Auth	Encryption	Classification
B1	Data Steward / Admin (One-time Loader)	Seed Data Excel	BigQuery Raw	Usecase Excel Catalog	thread-bq-writer-sa	HTTPS / TLS 1.2 minimum	Protected
B2	Cloud Scheduler	Cloud Run Jobs	Cloud Run Discovery Collector	Discovery job trigger, execution parameters	OIDC Service Account Token + IAM (Role: run.invoker)	HTTPS / TLS 1.2 minimum	Sensitive
B3	Cloud Run Discovery Collector	Internal and External Data Sources	Cloud Run	Agent inventory, model metadata, deployed agent details, model catalog information, cost feed metadata, SaaS inventory data, agent/tool metadata, repository information	GitLab Tokens, SaaS Credentials, API Tokens, thread-discovery-sa	HTTPS / TLS 1.2 minimum	Sensitive
B3-Response	Internal and External Data Source Systems	Internal/External Sources	Cloud Run	Agent/model/tool/endpoint metadata	GitLab Tokens, SaaS Credentials, API Tokens, thread-discovery-sa	HTTPS / TLS 1.2 minimum	Sensitive
B4	Cloud Run Discovery Collector	Cloud Run	BigQuery Raw	Raw discovered internal and external agent metadata, audit records, validation candidates, duplicate detection inputs	thread-bq-writer-sa	HTTPS / TLS 1.2 minimum	Sensitive
B5	Reconcile / Validate Job	BigQuery Raw	Cloud Run	Newly landed raw records requiring validation, canonicalisation, duplicate detection and conflict resolution	thread-bq-reader-sa	HTTPS / TLS 1.2 minimum	Sensitive
B6	Reconcile / Validate Job	Cloud Run	BigQuery THREAD SoR	Cleansed, validated, deduplicated, canonicalized agent metadata, relationships (entities + edges), stewardship-approved records	thread-bq-writer-sa	HTTPS / TLS 1.2 minimum	Sensitive
